TEST CERTIFICATE

EN 124:2015 -Gully tops and manhole tops for vehicular and pedestrian areas.
Part 3: Gully tops and manhole tops made of steel or aluminum alloys.
Number: A097.03.20_3
Drawing, Load Class: WL4865-01-AM-F900, Laod Class F900

This certificate is according EN 124:2015 -Gully tops and manhole tops for vehicular and pedestrian areas

- Part 1 – Definitions, classifications, general principles of design, performance requirements and test methods,
- Part 3 – Gully tops and manhole tops made of steel or aluminum alloys

issued by DEKRA Incos GmbH.

Declaration of DEKRA Incos
DEKRA Incos declares that the "Covers of Aviation Hydrant Housings" Pit Lids and Mounting Rings made of cast iron or steel, aluminum alloys by the manufacturer meet the technical requirements set out in this product certificate. At the same time, the requirements of EN124:1994 are fully met. The marking according to EN124-3, Section 9 and this certificate, indicates this.

Since EN124-3 is not a European harmonized standard at the time the certificate is issued, the compliance with EN124-3 is declared in Chapters 1 to 9. Annex ZA of EN124-3 is not part of this certificate.
